

FIMRO[®] GmbH
Druckguss- und Kunststofftechnik

Contamination indicator with green/red signal

Specially designed for filters of temperature control units.

- simple and quick identification of the contamination of the filter by green / red signal
- measurement based on the differential pressure at the filter
- adapted for water and oil temperature control units
- automatic reset of indicator

optional inclusive filter:

- filter up to 16 bar
- stainless steel filter
- filter cartridge 250µm—stainless steel mesh
- 2 x 3/4" connection
- pipes and connection in stainless steel

Adaptation for almost all filter system of the temperature control unit is possible.
