3.0

Cleaning and testing of temperature control channels with the Fimro - SPM series systems

- ▶ Increased process reliability
- ▶ No mold disassembly
- ▶ Ideal heat transfer
- ▶ Cleaning to remove a wide variety of contaminants
- ▶ Flow rate testing
- ▶ System leak testing

SPM series

- ▶ Robust systems made of stainless steel
- ▶ Easy to operate manually or automatically
- ▶ Multiple circuits
- ▶ In-house development and production
- ▶ Production certified according to ISO 9001

SPM 75

Small, compact system for a small number of temperature control channels.

- ▶ 2 circuits
- ▶ Flow measurement
- ▶ Pressure density measurement
- ▶ System pump with 70 l/min
- ▶ Mobile
- ▶ Manual

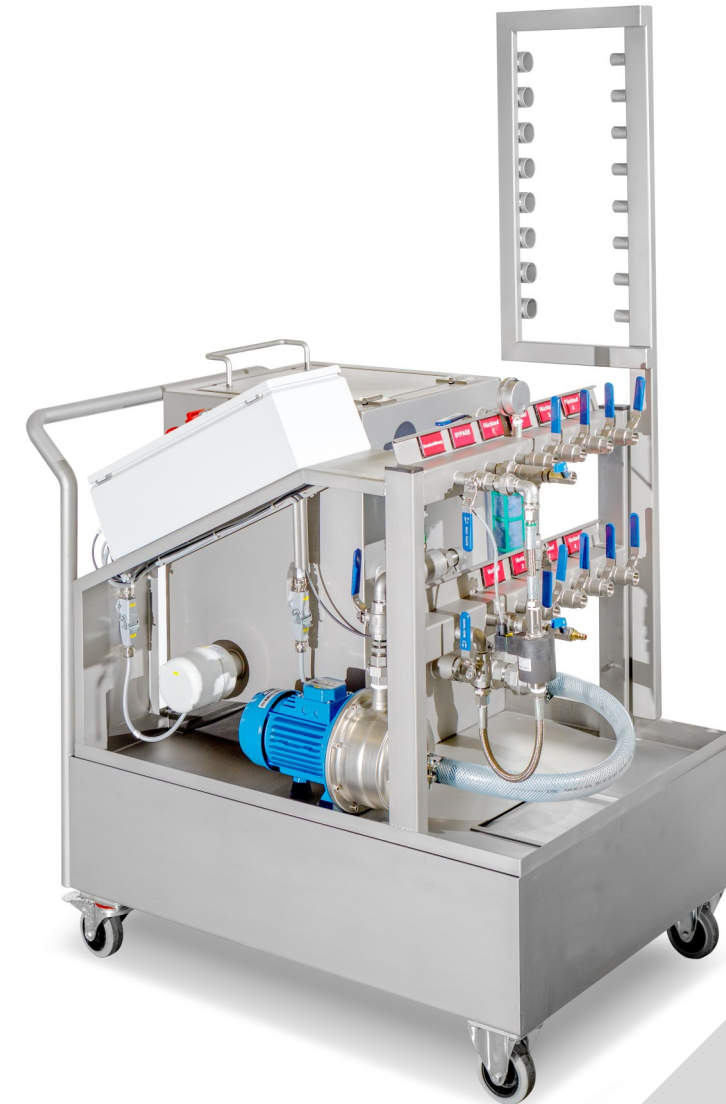

SPM 75

SPM 120

A medium-sized mobile system that combines all components in a small space. It's ideal for a small to medium number of temperature control circuits and is highly flexible in its use.

- ▶ 4 circuits
- ▶ Flow measurement
- ▶ Pressure density measurement
- ▶ System pump with 70 l/min
- ▶ Mobile
- ▶ Manual

SPM 120

SPM 123

Medium-sized mobile system with the option of automatic program execution.

- ▶ 6 circuits
- ▶ Flow measurement
- ▶ Pressure density measurement
- ▶ Frequency-controlled pump with 80 l/min
- ▶ Mobile
- ▶ Manual or automatic

SPM 123

SPM 200

Largest mobile system, with the possibility of automatic program execution.

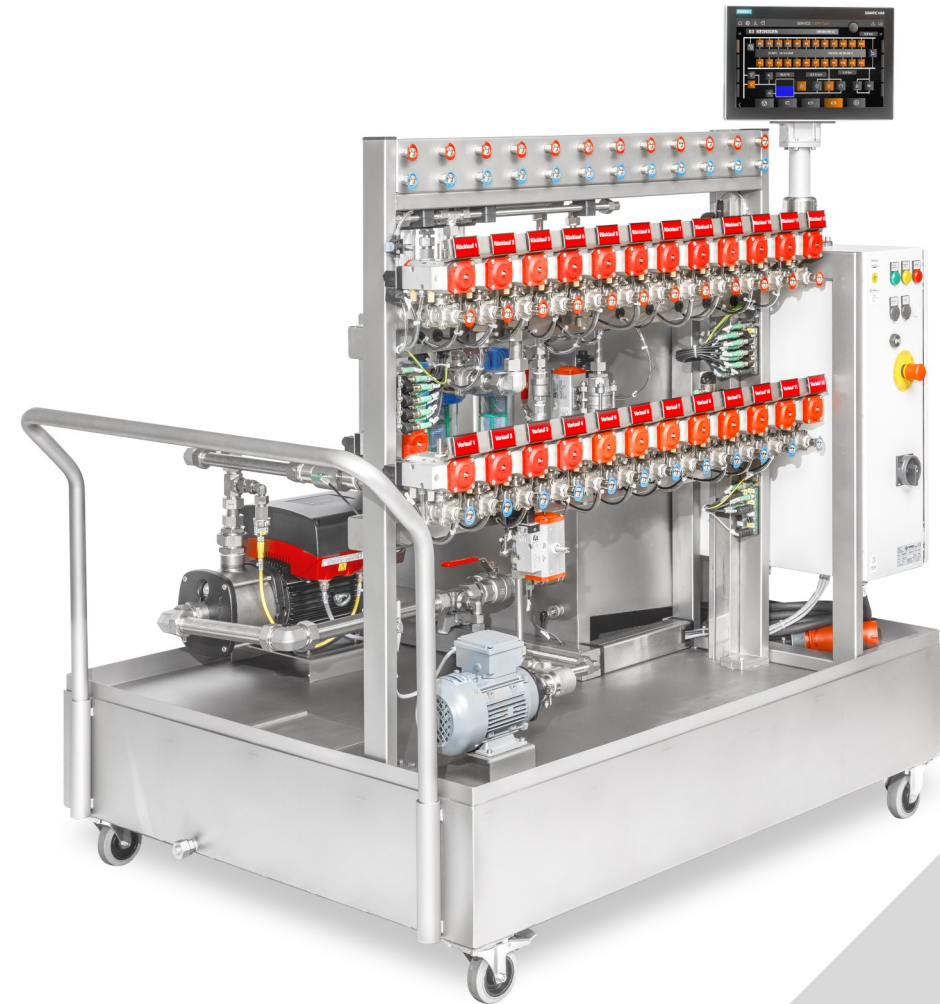

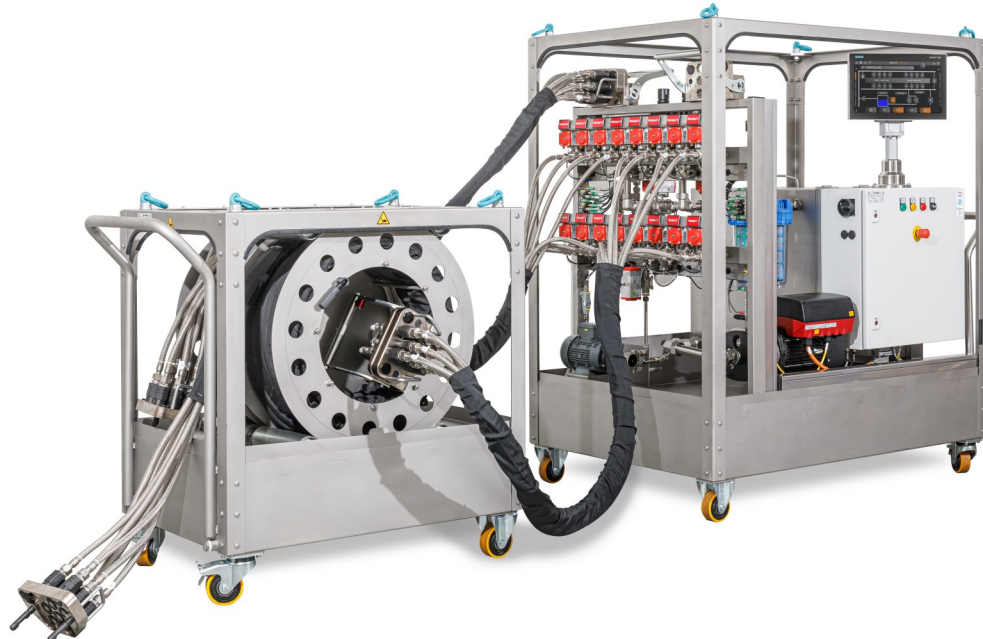

- ▶ 8 to 12 circuits
- ▶ Flow measurement
- ▶ Pressure density measurement
- ▶ Frequency-controlled pump with 120 l/min
- ▶ Mobile
- ▶ Manual or automatic

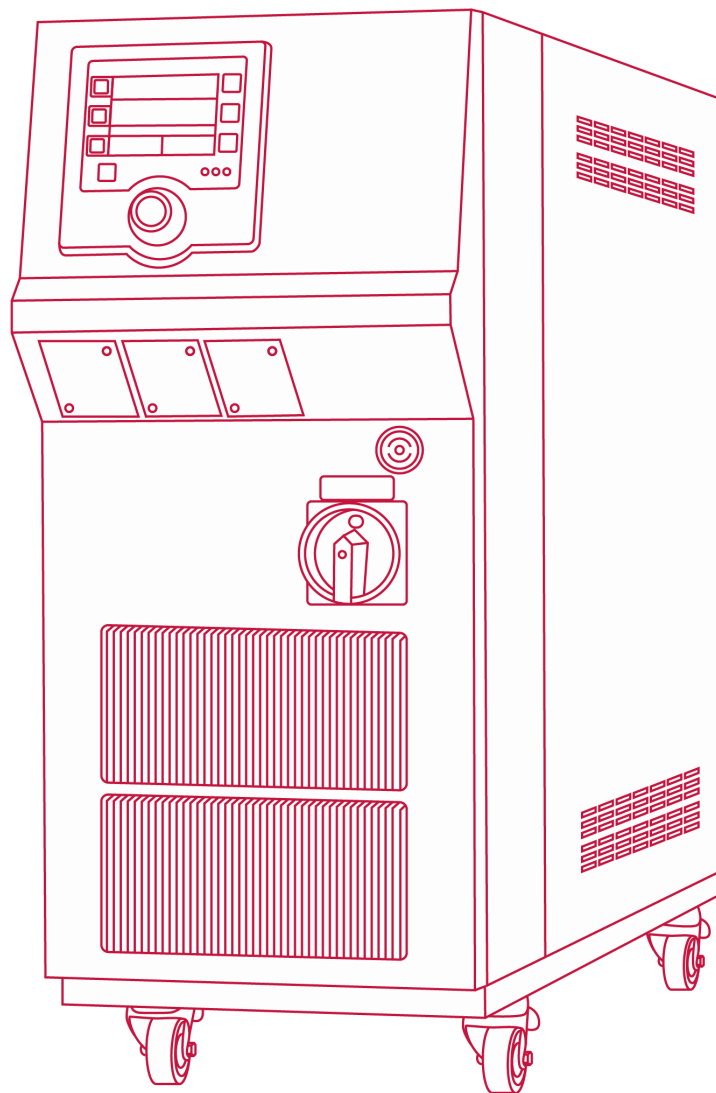

SPM 200

SPM customized

If you cannot find the ideal system in our large selection of SPM series, we will be happy to develop a suitable system for you.

FIMRO[®] GmbH
Druckguss- und Kunststofftechnik

Service for temperature control devices

30 years of experience in servicing temperature control devices

- ▶ Service and Maintenance
- ▶ Safety inspections
- ▶ Measuring equipment testing and calibration
- ▶ spare parts inventory for short response times
- ▶ Devices from all manufacturers
- ▶ Service and testing certified according to ISO 9001

Service

Rental equipment

For testing, covering production peaks or bridging the gap in service and repairs – we offer the right systems to optimally meet your requirements.

- ▶ Temperature control units
- ▶ SPM cleaning and testing devices for temperature control channels
- ▶ Vacuum systems
- ▶ Cooling systems

Rental
